

ORIENTATION

Orientation refers the way you place your home on its sites to take advantage of climatic features such as sun and cooling breezes. Your home is thus more comfortable to live in and cheaper to run. It takes account of summer and winter variations in the sun's path as well as the direction and type of winds.

More information is available in the Australian "Your Home" guide. For pdfs or to order a copy of the book go to www.yourhome.gov.au
