

Open Home Welcome Video or Script

Ideally, on Sunday 4 May 2025, you will have a TV or computer with a decent sized screen in a space big enough for a full tour group, to play the Welcome video provided by Renew.

If that's not possible, you can incorporate the script below into your Introduction at the start of your tours.

Play the Renew video

On your TV or computer, open a browser window (eg Chrome or Safari).

Go to sustainablehouseday.com then the Homeowner Dashboard > "Helpful Resources to prepare your home" section and click the link for the "Renew CEO Welcome video for open homes".

Or click this link [Renew CEO Welcome video for open homes](#).

This should open the video into a YouTube player. Play the video to test the video and sound.

Reset it to the beginning and you are ready to play it for your visitors.

Or read this

We would like to welcome you to Sustainable House Day 2025.

This event is hosted by Renew, a small not-for-profit organisation that publishes two great magazines: Sanctuary Magazine, about modern green homes, and Renew Magazine, about technology for a sustainable future. There is a discount on subscriptions for the magazines until the end of May in your Sustainable House Day brochure *[wave the brochure!]*.

Renew hopes that whatever houses you are visiting today, you will get lots of information, advice and support for your sustainability journey. You can hear more advice from experts and homeowners by joining the series of 8 webinars over the month of May, as well as by attending events hosted by local organisations in the community events program.

Renew is passionate about the power of conversation and sharing of knowledge and experience within communities, and thanks the more than 230 homeowners, plus Council Partners, Community organisations, Sponsors and participants like yourselves across the country who make this national event so valuable.
